FRETLIGHT®
GUITAR

INTRODUCING THE FRETLIGHT BASS FB-525

The FB-525 gets big tone out of its single coil bridge pickup and classic "P" style neck humbucker. Controls include a 3-way pickup toggle switch, Master volume and Master tone. The Fretlight neck includes our patented Advanced Polymer Fretboard and the world's only built-in LED learning system. The FB-525 is finished with chrome hardware including a fixed bridge and a two-way truss rod. Fully adjustable bridge saddles give you complete adjustability for a playing experience that can only be described as pure heaven. Don't forget, the Advanced Polymer Fretboard and Stratabond birch neck gives your tone a sustain that you've only dreamed about!

The 500 Series high efficiency electronics produce the brightest and most consistent LED lights ever. Whether you're lighting a simple bass line, or a scale across the entire fretboard, the lights will maintain a consistent brightness. Additionally, the FB-525 has a Stratabond™ neck. Stratabond is a state-of-the-art engineered hardwood that yields uncommon strength and rigidity across ever changing environmental conditions. Perfect for guitar necks that are susceptible to expansion and contraction due to varying humidity levels. The Fretlight learning system allows a player to light-up songs, riffs, chords and scales right on the neck of the Fretlight bass guitar. The Fretlight bass is fully compatible with Guitar Pro 6 Fretlight Ready™ tablature playback and creation software. The Fretlight system connects to a PC or Mac. Stratabond™ is a Trademark of the Rutland Corporation.

Included with the Fretlight Bass:

- 10 ft. Fretlight USB Cable
- Fretlight Owner's Manual (.pdf)
- Fretlight Studio Software
- Hal Leonard Lennon & McCartney for Bass Guitar interactive video lessons
- Absolute Beginners (Bass Guitar)
- Bass Picks

MSRP: \$499.99
